Pushing the boundaries within your specifications

Discover the Kiremko quality

Constant innovation allows us to set the standard in the market every time. In this way we closely study each potato processing procedure, in order to develop and produce machines that are efficient, save water & energy, but also are low in maintenance, without sacrificing the quality of the end product. That is what Kiremko's quality is all about.

Total solutions that will lead you ahead

French fries, both frozen and fresh, flakes, pellet snacks, and many other potato products require a specific processing procedure.

We offer reliable comprehensive solutions, from the infeed of potatoes to the packaging lines for end products. From design and production to the installation of complete processing lines, factory upgrades, expansion of capacity and individual machines. We push the technological boundaries with your specific requirements as a starting point and guarantee reliability and continuity. In that way we get the best out of the potato and your production process.

At Kiremko we challenge ourselves every day to improve potato processing. By improving our own process and know how, we are able to enjoy in the success of our customers. ■

The global strength of Kiremko

“Teamwork is not simply a word to us, but the key to success.”

Behind Kiremko is a worldwide network of reliable partners and suppliers. Thanks to the cooperation with Idaho Steel Products, Reyco Systems and various other strategic partners, we always have the latest technology at our disposal. We also continuously stimulate manufacturers of machines and components to work together, so that we can offer total solutions of the same quality - whatever your wishes and requirements may be.

In addition to the presence in the American market, we have offices in China and India. ■

Every process is unique

“ Knowledge of the process means continuity for your production process and the right investment in sustainable technologies. ”

Innovative processes

Innovation and improvements are in the Kiremko genes. Every day we are looking for even better solutions. In addition to yield and quality, we also focus on efficiency and cost reduction. More attention is being paid to sustainable technologies, such as energy and water recovery systems.

Nothing is impossible, that is why we continue to innovate in order to get the best result out of your production process. With our knowledge of the potato process, we are able to develop innovative production processes.

In this way we produce your processing line, with a high-quality end product as a starting point, in which each machine stands for inventiveness and reliability.

We continue to innovate and develop to offer you the best total solution. ■

Every country and every customer is unique. That is why we develop a processing line for every project that at least meets the minimum requirements and regularly exceeds expectations.

French fries

French fries are available in all shapes and sizes. From fresh, frozen to coated product.

Coated French fries

Coating is used with, amongst other things, French fries, sweet potato and parsnip to make the product crispier or to add flavour.

Potato flakes

Potato flakes are important ingredients for numerous applications, including stackable chips and extruded snacks.

Formed potato products

Various shapes and sizes, made from mashed potato or potato flakes.

Pellet snacks

The frying of pellet snacks based on potato, cassava or corn is an accurate process.

Fresh cut and pre-cooked potato products

Various applications, from potato slices to halved or diced potatoes.

Specialties

Mash, hash browns, Reibekuchen and Tater tots; potato products that are produced in a special way.

Share knowledge, multiply success

We help you by making the right decisions by sharing our knowledge, specialist information and reliable data with you. Whether it concerns a new factory or an upgrade of your existing processing line, the information you need often goes beyond the specifications of machines or lines. Kiremko Project Development is your knowledge partner.

Our know how of potato features, varieties and processing, specific locational circumstances worldwide and intended end products is at your disposal. In addition, we are pleased to provide you with insight performance-enhancing aspects, such as technology, energy, environment and logistics.

Our know how is at your disposal.

Own production, laboratory and training facility
 In our state-of-the-art production facility in the Netherlands (> 10,000 m²) we have our own laboratory. We now have the opportunity to continuously perform tests and provide training.

Complete installation
 The Kiremko service team travels around the world to install processing lines themselves. The Kiremko standard in terms of quality, hygiene and safety is always the point of focus. ■

Create a better world for people, planet and potato ...

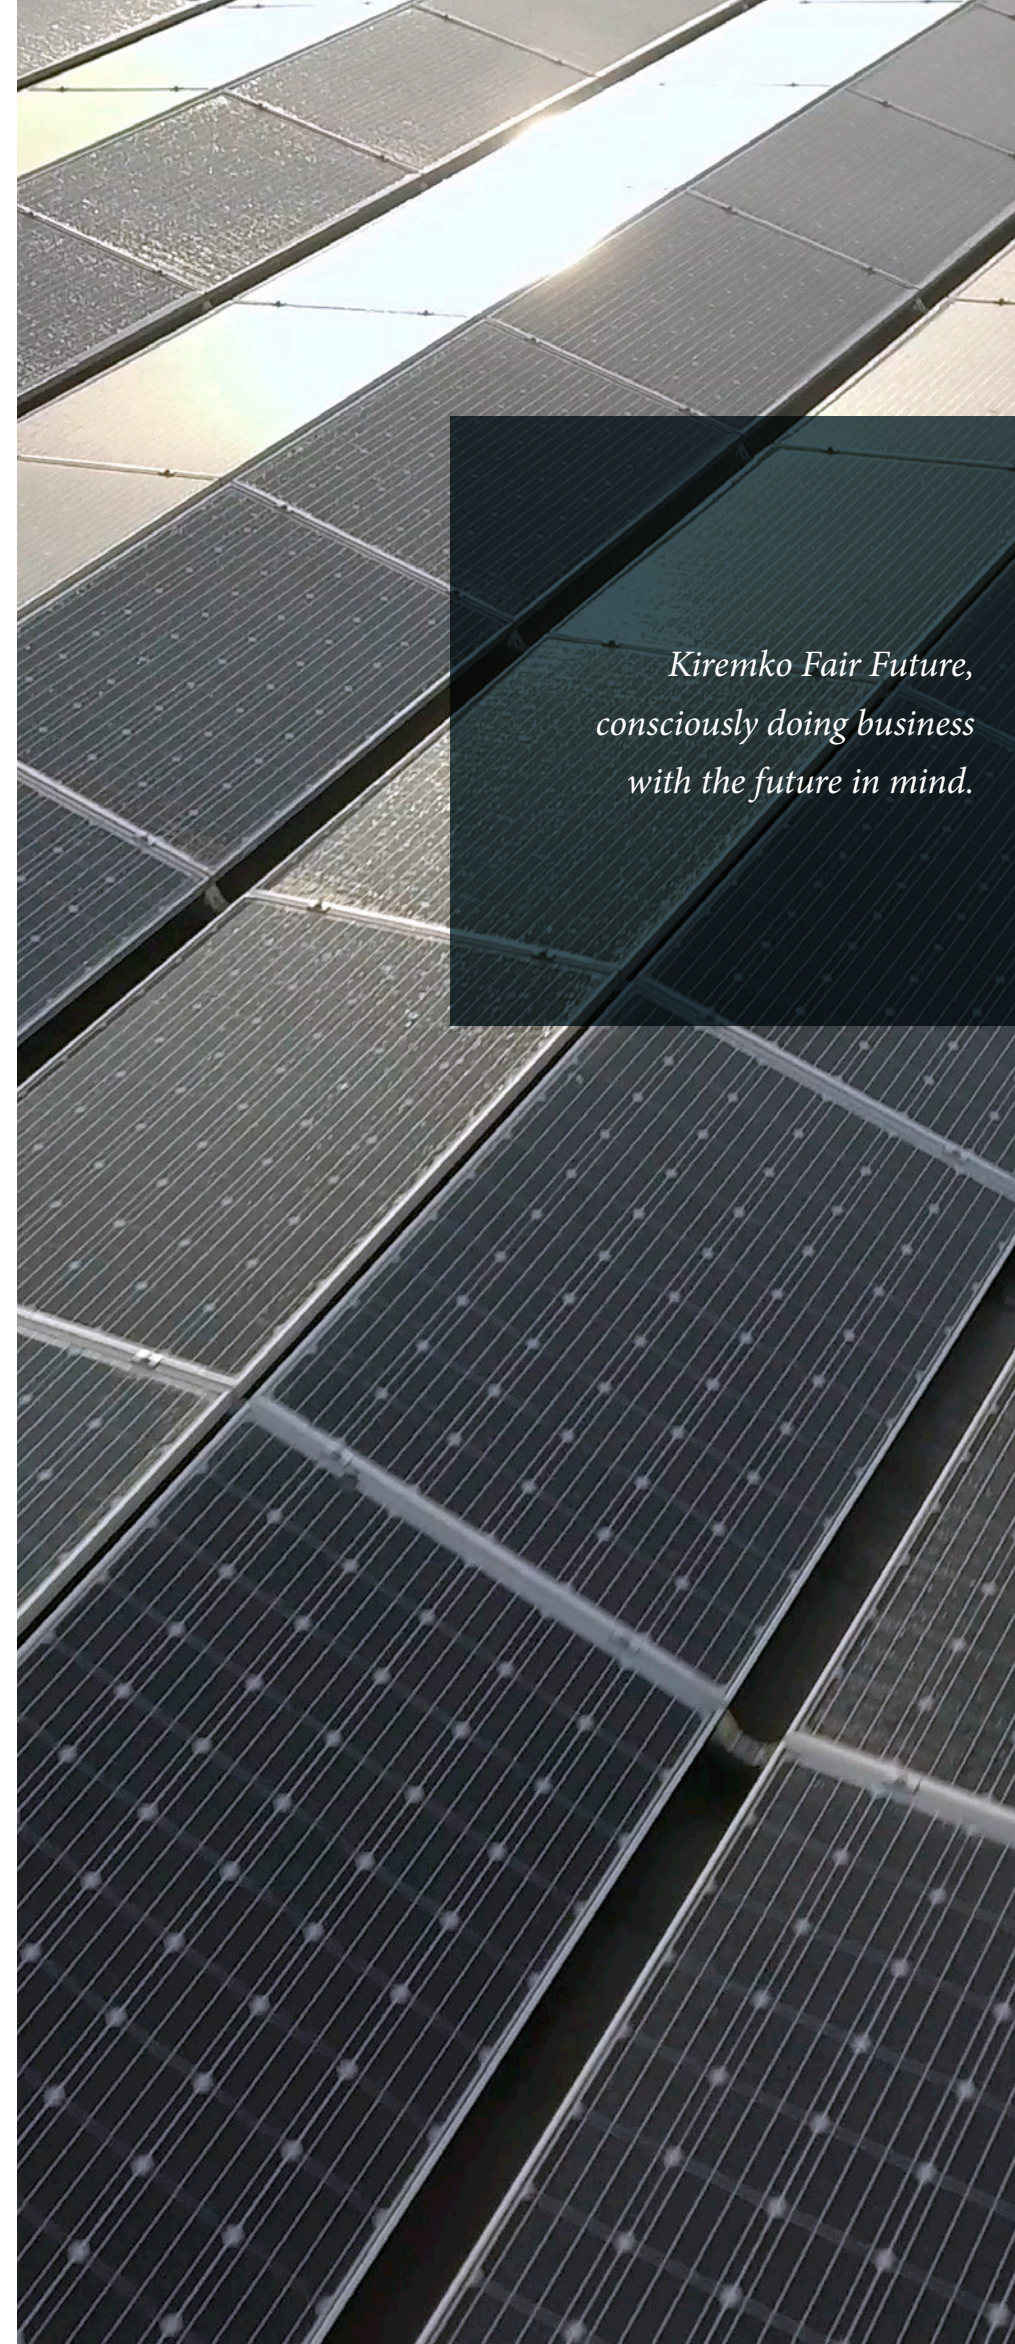

At Kiremko, we challenge ourselves every day to further improve the processing of potatoes. That means we not only work on new machines and production lines but also on our customers' success.

We would like to inform you about the sustainable way in which we do this, because we believe that this is the only way for a modern company like ours to progress. And because Kiremko's stable future depends on motivated employees, a healthy planet and the best potatoes being processed by customers.

We make conscious choices to serve our own interest and that of our customers. Our solutions comply with the strict environmental standards for new factories and production lines.

Together with our clients we are working towards a circular economy, one step at a time. Until this has been accomplished, we will keep looking for new ways to reduce and recycle waste flows, energy and water consumption.

Consciously doing business to create a better world. That is a Fair Future for Kiremko. ■

Kiremko Fair Future, consciously doing business with the future in mind.

“Together with our clients we are working towards a circular economy.”
