

INTRALOX FOODSAFE MPB PORTFOLIO

THE ONLY SOLUTION THAT ADDRESSES FOOD CONVEYANCE CHALLENGES FROM EVERY ANGLE

Maintaining conveyance systems in food processing is challenging. Too often, piecemeal changes are made to treat symptoms rather than addressing root causes. This reactive approach is costly and ineffective.

What if you could access an entire suite of modular plastic belting (MPB) products, services, and training that's designed and engineered specifically to address the root causes of food conveyor challenges?

You can. Introducing the Intralox® FoodSafe™ MPB Portfolio.

FMC Conveyor Program

Modular Plastic Belting

Tools and Components

Digital, On-demand Training

Separately, each item within the portfolio addresses a specific critical issue—such as minimizing belt edge breakage—to bring processors one step closer to food safety and operational excellence.

Together, these solutions form a powerful blend of products, services, and support that will transform your operations, increase uptime, and maximize throughput.

Whatever your food conveyor challenges may be, the Intralox FoodSafe MPB Portfolio can help set your facility on a course of long-term operational effectiveness, food safety, and profitability.

INTRALOX FOODSAFE MPB PORTFOLIO

FMC Conveyor Program

A thorough, on-site assessment of your critical conveyors followed by a customized, interactive workshop to uncover the main source of your MPB food conveyor challenges and train your team how to properly manage conveyor systems

Modular Plastic Belting

Heavy-Duty Edge (HDE)

Robust, closed-edge belting that minimizes catchpoints and reduces breakage risk

PK material

A rugged, high-performance belt material that's more impact, chemical, and abrasion resistant than acetal

Tools and Components

Conveyor Shaft Optimization

Prevents belt damage caused by sprocket migration with components designed to maximize conveyor performance

Intralox Rod Remover

Allows you to easily remove or insert belt rods without causing damage

Intralox Belt Puller

Enables simpler, faster, and safer belt reinstallation in a solid metal, handheld tool

Intralox Clean Release

Facilitates quick, easy, tool-free removal and installation of S800 HDE belts

Digital, On-demand Training

Comprehensive online training to grow the skill sets and knowledge of new and existing employees on proper conveyor maintenance, belt handling, and troubleshooting
